- Thickness: 0.10mm-0.5mm
- Material: PVC
- Highlight: **1400mm High Gloss PVC Film, Membrane Press High Gloss PVC Film, 1400mm PVC Film Roll**

Product Description

Product Description:

Our **pvc foil** is primarily made from Polyvinyl Chloride (PVC), a synthetic plastic material known for its durability, flexibility, and ease of processing.

It is available in a wide range of colors, patterns, and textures, mimicking the look of natural materials like wood, stone, fabric, or metal, providing a cost-effective alternative.

It can be applied to a variety of surfaces, such as doors, cabinets, furniture, walls, etc. while being easy to maintain and durable enough to be used in high-traffic locations. The affordability of pvc decorative foil in comparison to natural materials is one of its main benefits. Manufacturers offer a large range of styles and finishes, enabling modification to meet project specifications and personal design preferences. It is commonly used in residential and commercial settings for applications like kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, etc.

Technical Parameters:

Our **PVC film** can vary in terms of **thickness** from 0.1mm to 0.5mm., and is provided in widths of 1260mm and 1400mm, and lengths of 100-400m/roll.

The design ranges from wood grain, solid color, marble, brick and many other options, and there are a wide variety of **surface treatments** such as matt, super matt, embossed, high gloss and soft touch. What's more, customers can choose to go for the **OEM** and **ODM** service.

Applications:

Different Process for different application:

Membrane Press (vacuum press)

The process of Membrane Press (vacuum press) is used to cover MDF, particleboard, wooden board, fiberboard, etc. It can cover embossed board and five surfaces at same time. It works well for doors, kitchen cabinet, wardrobe, furniture, etc. The characteristic of it should be considered such as thickness (0.2-0.5mm), width (1260mm and 1400mm), length (100-300m/roll).

Wrapping Profiles

The process of Wrapping Profiles is applied to all kinds of profiles, such as wood profile, aluminum profile, PVC profile, etc. It is suitable for covering door frame, window sill, base channel, PVC ceiling and so on. Its thickness is from 0.12-0.18mm, width is 40-1260mm, length is 300-800m/roll.

Cold Laminating

Cold Laminating is suitable for flat panels, such as wood panel, steel panel, aluminum panel, PVC panel, etc. Its thickness is 0.12-0.20mm, width is 1240-1260mm, length is 300-500m/roll. This process works well for doors and furniture.

Hot Laminating

Hot Laminating is mainly applied to PVC panel, steel panel, aluminum panel for doors, skirting and more. Its thickness is 0.16-0.30mm, width is 1260mm, length is 200-300m/roll.

Self-adhesive

The process of self-adhesive has features of thickness (0.1-0.2mm), width (600mm/1220mm) and length (in 5-50m/roll). It can be put on any smooth surface for furniture and indoor decorations.

Customization:

Realsun Deco offers **PVC composite film**, **PVC film for closet door**, and **PVC composite film for wall panel**, with OEM and ODM services. This product is made in Foshan, China, with a variety of material options, such as PVC marble, brick, wood grain, and more. The product thickness ranges from 0.10mm to 0.5mm, with a minimum order quantity of 3000m/model.
