- Highlight: **decorative laminate film 1260mm,
Heat Resistant lamination pvc film,**

Product Description

Heat-Resistant and Waterproof Laminate Plastic Sheet 1260mm Width

Product Description:

Material: The main ingredient of our **PVC foil** is **Polyvinyl Chloride (PVC)**, a synthetic plastic with excellent strength, flexibility, and processing simplicity.

Appearance: We offer a variety of *colors, patterns, and textures* for our pvc foil. When compared to real materials like wood, stone, cloth, or metal, it can imitate their appearance while being more affordable and maintaining a premium appearance.

Adaptability: Our foil is suitable for **a wide range of surfaces, such as walls, doors, cabinets, and furniture**. It works effectively on many surfaces and **can be applied in various interior spaces**.

Durability: **Realsun Deco PVC foil** is well known for its **strength and resistance to deterioration**. Its longevity makes it a popular choice for high-traffic areas.

Maintenance: After it is installed, our pvc foil doesn't need much attention. It only needs to be cleaned once a week with a wet cloth, making maintenance easy.

Economical: One of the primary advantages of **pvc decorative foil** is its lower cost when compared to natural materials. It allows for the creation of **sophisticated aesthetics without the associated costs**.

Modification: Manufacturers offer a **wide variety of styles and finishes**, making it possible to **modify to satisfy project requirements and individual design preferences**.

Application: Decorative pvc foil is frequently used for wall paneling, furniture surfaces, retail displays, interior doors, kitchen and bathroom cabinets, and other uses in both **home and commercial settings**.

Features:

Product Name: PVC Lamination Film

Length: 100m-400m/roll

Width: 1260mm, 1400mm

Design: Wood Grain, Marble, Brick, Stone, Plain Color Etc.

Service: OEM, Customized Design And Size

Application: Furniture, Door, Wall, Kitchen Cabinet, Ceiling Etc.

Keywords: wood grain pvc lamination film, lamination film, laminate plastic sheet

Technical Parameters:

Our company is specialized in producing PVC film thickness ranging from 0.1 to 0.5mm, with widths of 1260mm and 1400mm. The roll length is 100 to 400m, and the film can be designed with wood grain, solid color, marble, brick and more. Additionally, the surface can be treated with matt, super matt, embossed, high gloss, and soft touch, making your product unique. We also provide OEM and ODM services.

Applications:

Membrane Press (vacuum press): This process is used to cover MDF, particleboard, wooden board, fiberboard, etc., for doors, kitchen cabinet, wardrobe, furniture, etc. It can cover embossed board, cover five surfaces at same time. The thickness of this press is 0.20-0.50mm and width is 1260mm,1400mm, while the length is 100-300m/roll.

Wrapping Profiles: This is for covering all kinds of profiles including wood profile, aluminum profile, PVC profile, etc. for door frame, window sill, base channel, PVC ceiling and so on. The thickness is 0.12-0.18mm, while width is 40-1260mm and length 300-800m/roll.

Cold Laminating: This process is for covering all kinds of the flat panels, such as wood panel, steel panel, aluminum panel, PVC panel, etc. for doors and furniture. The thickness of this is 0.12-0.20mm, width 1240-1260mm and length 300-500m/roll.

Hot Laminating: This Process is used to cover the PVC panel, steel panel, aluminum panel for doors, skirting and so on. The thickness of this process is 0.16-0.30mm, while width is 1260mm and length is 200-300m/roll.

Self-adhesive: This process is for putting on any smooth surface for furniture and indoor decorations. The thickness is 0.10-0.20mm, width 600mm/1220mm and length 5-50m/roll.
