- Thickness: 0.1-0.5mm
- Width: 1260mm, 1400mm
- Application: Furniture, Door, Cabinet, Wall, Profile, Ceiling Etc.
- Feature: Waterproof, Anti Flame, Anti Scratch, Antibacterial , Etc.
- Material: PVC
- Length: 100-400m/roll
- Highlight: **Thermofoil PVC Furniture Film,
Kitchen Cabinet PVC Furniture Film**

Product Description

Product Description:

Our Deco PVC Foil is made with Polyvinyl Chloride (PVC), a synthetic plastic with excellent strength, flexibility, and processing simplicity. We offer a variety of colors, patterns, and textures, and the material can imitate the appearance of real materials like wood, stone, cloth, or metal but is more cost-effective and has a premium appearance. The foil is suited to a range of surfaces like walls, doors, cabinets, and furniture and has exceptional strength and resistance to deterioration. Maintenance is easy - just clean with a wet cloth once a week. Furthermore, it is a cost-friendly option as its lower cost is significantly lower than natural materials. Moreover, manufacturers have a wide assortment of styles and finishes for modification. Our decorative PVC foil is commonly used for wall panels, furniture surfaces, retail displays, interior doors, kitchen and bathroom cabinets, and other usages in both residential and commercial settings.

Features:

PVC Furniture Film - thermofoil for decoration, pvc film for furniture, furniture laminating film, pvc furniture film

Material: PVC

Payment Term: T/T, L/C, Paypal, Etc.

MOQ: 3000m/model

Width: 1260mm, 1400mm

Thickness: 0.1-0.5mm

Technical Parameters:

We offer a wide array of colors and textures, all offering premier performance. Our high-quality laminate sheets come in thicknesses ranging from 0.1mm to 0.5mm, widths of 1260mm and 1400mm, and length of rolls of up to 400m.

Our design selection includes a variety of wood grain, solid color, marble, brick, and more. We also offer five distinct surface treatments: matt, super matt, embossed, high gloss, and soft touch. We are pleased to provide both OEM and ODM services to meet your requirements and specifications.

Applications:

The type of application determines the process used. Membrane Press (vacuum press) is used for a thickness of 0.20-0.50mm, width of 1260mm or 1400mm and length of 100-300m/roll. This process is used for coverings on MDF, particleboard, wooden board and fiber board for doors, kitchen cabinets, wardrobes, and furniture. It can cover embossed board and cover five surfaces at the same time. Wrapping Profiles is used for thickness of 0.12-0.18mm, width of 40-1260mm and length of 300-800m/roll. This process is used for coverings on all types of profiles such as wood profile, aluminum profile, and PVC profile for door frames, window sills, base channels, and PVC ceilings.

Cold Laminating is used for a thickness of 0.12-0.20mm, width of 1240-1260mm and length of 300-500m/roll. This process is used for covering flat panels such as wood, steel, aluminum, and PVC for doors and furniture.

Hot Laminating is used for a thickness of 0.16-0.30mm, width of 1260mm and length of 200-300m/roll. This process is used to cover PVC panels, steel panels, and aluminum panels for door and skirting.

Finally, Self-adhesive is used for a thickness of 0.10-0.20mm, width of 600mm/1220mm and length of 5-50m/roll. This process is often used to stick to any smooth surface for furniture and indoor decorations.
