Basic Information

- Place of Origin: Foshan, China
- Brand Name: Realsun Deco
- Minimum Order Quantity: 3000m/model
- Price: Negotiable
- Packaging Details: Pack in roll
- Delivery Time: 15-20 days
- Payment Terms: T/T 30% down payment, 70% balance before shipment
- Supply Ability: 500000m/month

Product Specification

- Surface: Glossy/ Matt/ Embossed/ Super Matt/ Soft Touch
- Usage: Lamination, Wrapping Machine, Vacuum Membrane Press
- Width: 1260mm, 1400mm
- Service: OEM, ODM
- Length: 100m-400m
- Design: Wood Grain, Marble, Brick, Stone And So On
- MOQ: 3000m/model
- Application: Furniture/ Cabinet/ Door/ Wall/ Ceiling/ Profile, Etc.
- Highlight: **Long Lasting Marble PVC Film, Glossy Surface Marble PVC Film**

Marble PVC Film Glossy Surface For Wrapping Machine

Product Description:

Overview of Marble PVC Film

Material: The core component of our Marble PVC Film is Polyvinyl Chloride (PVC), revered for its outstanding durability, pliability, and ease of manufacturing. This synthetic polymer is recognized for its significant strength and flexibility.

Visual Appeal

Appearance: We are proud to present a broad assortment of hues, designs, and textures in our Marble PVC Film collection. Expertly crafted to mimic the look of genuine materials such as wood, stone, fabric, or metal, our foils offer an economical alternative without compromising on style, giving off a luxurious vibe.

Versatile Usage

Adaptability: Designed for versatility, our foil seamlessly conforms to numerous surface types, including walls, doors, cabinetry, and furniture items. Its flexible nature ensures it is adept for a multitude of applications across different interior settings.

Robust and Long-Lasting

Durability: The Realsun Deco Marble PVC Film is renowned for its robustness and its superior resistance to wear and tear. Its durability is particularly beneficial in places with high footfall, offering long-lasting quality.

Low-Maintenance

Maintenance: Post-installation, our Marble PVC Film does not demand extensive upkeep. A simple cleanse with a damp cloth on a weekly basis is sufficient to keep it in excellent condition, ensuring the maintenance effort is minimal.

Affordability

Economical: The cost-effectiveness of our decorative Marble PVC Film is one of its standout virtues. It facilitates the realization of elegant interior designs at a fraction of the price associated with natural materials.

Customization

Modification: A plethora of styles and finishes are at the disposal of manufacturers, enabling the tailoring of the product to meet the specific needs of a project or personal taste preferences.

Practical Applications

Application: Marble PVC Film finds its place in a myriad of applications such as wall paneling, furnishing surfaces, retail setups, interior passageways, and storage units in kitchen and bathroom areas, prevalent in both residential and business environments.

Features:

Product Name: Marble PVC Film

Thickness: 0.10mm-0.50mm

Packing: Pack In Roll

Design: Wood Grain, Marble, Brick, Stone And So On

Width: 1260mm, 1400mm

Feature: Non-toxic

Feature: Anti-Flame

Feature: Moisture-proof

Keyword: pvc door foil

Keyword: pvc wood grain foil

Keyword: Marble PVC Film

Applications:

Product Application Processes

1. Membrane Press (Vacuum Press)

Designed for creating seamless covers on various boards, the membrane press or vacuum press uses materials with a thickness ranging from 0.20 to 0.50mm, width of either 1260mm or 1400mm, and length between 100 and 300 meters per roll. This process is ideal for applying coverings to MDF, particleboard, wooden board, and fiberboard used in manufacturing doors, kitchen cabinets, wardrobes, furniture, and more. Additionally, it can cover embossed boards, wrapping up to five surfaces simultaneously.

2. Wrapping Profiles

With a material thickness of 0.12 to 0.18mm, widths from 40 to 1260mm, and lengths of 300 to 800 meters per roll, wrapping profiles are used to cover various kinds including wood, aluminum, and PVC profiles. This method is suitable for door frames, window sills, base channels, PVC ceilings, and others.

3. Cold Laminating

The cold laminating technique involves covering flat panels such as wood, steel, aluminum, and PVC panels. These are often utilized in door and furniture applications. The materials used in this process have a thickness of 0.12 to 0.20mm, width of 1240-1260mm, and length ranging from 300 to 500 meters per roll.

4. Hot Laminating

Hot laminating works well for covering PVC, steel, and aluminum panels thanks to the heat-fused application that creates a durable bond. The material used in this method has a thickness of 0.16 to 0.30mm, a standard width of 1260mm, and lengths of 200 to 300 meters per roll. Common uses include doors and skirting covers.

5. Self-adhesive

Offering the convenience of a peel-and-stick application, self-adhesive materials come with a thickness of 0.10 to 0.20mm and are

available in widths of 600mm or 1220mm. The rolls are shorter, ranging from 5 to 50 meters, making them perfect for applying to any smooth surface on furniture and indoor decorations.
